U.S.-Flag Lakes Cargos Up Nearly 7 Percent in November

CLEVELAND – U.S.-flag Great Lakes freighters (lakers) moved 8.4 million tons of cargo in November, an increase of 6.7 percent compared to a year ago. However, the November float was 6.7 percent below the month's 5-year average.

Iron ore cargoes for the steel industry totaled 4.7 million tons in November, an increase of 29.6 percent compared to a year ago. However, coal shipments to power plants and steel mills fell to 1.2 million tons, a decrease of more than 20 percent. Aggregate and fluxstone for construction projects and steel production totaled 2 million tons, a decrease of nearly 10 percent compared to a year ago.

Year-over-year U.S.-flag carriage stands at 76.2 million tons, a decrease of 4.5 percent. Iron ore cargoes are up 6.6 percent, but coal loads have dipped 25.8 percent. Limestone shipments trail last year by 7 percent.

Lake Carriers' Association represents 14 American companies that operate 56 U.S.-flag vessels on the Great Lakes and carry the raw materials that drive the nation's economy: iron ore and fluxstone for the steel industry, aggregate and cement for the construction industry, coal for power generation, as well as salt, sand and grain. Collectively, these vessels can transport more than 100 million tons of cargo per year. More information is available at www.lcaships.com.
